EDUCATION

Madanapalle Institute of Technology & Science (MITS)

Madanapalle, Andhra Pradesh

B.Tech in Artificial Intelligence & Machine Learning

Expected: May 2029

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: Python, Java, SQL

Web Technologies: HTML5, CSS3

Databases: MySQL (CRUD, Joins, Indexing, Stored Procedures)

Libraries & Frameworks: NumPy, Pandas, Streamlit

Tools & Platforms: Git, GitHub, VS Code

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

AI-Integrated E-Commerce Analytics Dashboard

Python | MySQL | Streamlit | Gemini API

- Built a full-stack analytics dashboard using Streamlit and MySQL that enables real-time querying and visualization of e-commerce sales and inventory data.
- Integrated Google Gemini API to power an AI chatbot that accepts natural language queries and auto-generates context-aware SQL reports from a structured relational database.
- Implemented NLP-driven query parsing that allows non-technical users to extract structured data insights through a conversational interface, eliminating manual SQL report writing.

Student Performance Prediction System

Python | Pandas | Scikit-learn | Matplotlib

- Engineered an end-to-end ML pipeline using Scikit-learn to predict student academic outcomes from a dataset of 1,000+ records including attendance, scores, and behavioral features.
- Applied data preprocessing techniques — null-value imputation, label encoding, and feature scaling — improving model accuracy by ~12% over a baseline linear regression model.
- Visualized model predictions and feature importance using Matplotlib, generating reports that identify key risk indicators to support early academic intervention.

CODING PROFILES

- LeetCode: Actively solving problems in arrays, strings, binary search, linked lists, and dynamic programming — targeting 100+ problems before internship applications.
- GitHub: Maintaining version-controlled public repositories with detailed READMEs documenting project architecture, setup, and usage.
- HackerRank / CodeChef: Participating in timed programming contests to sharpen algorithmic problem-solving under time constraints.

CERTIFICATIONS

- Python for Everybody — Coursera / University of Michigan (Planned)
- Machine Learning Specialization — Andrew Ng, Coursera (Planned)
- AWS Cloud Practitioner Essentials — AWS Training (Planned)

ACHIEVEMENTS

- Selected for a specialized B.Tech program in Artificial Intelligence & Machine Learning at MITS, a rigorous curriculum covering ML, data science, and systems programming.
- Independently designed and deployed an AI-powered analytics dashboard integrating Gemini generative AI, MySQL, and Streamlit — demonstrating full-stack and API integration skills.
